Message from the Founder

It is my distinct pleasure to extend a warm welcome to you on my personal profile and introduce H Healthcare Berhad – a healthcare group that is guided by a clear vision, mission, and values, dedicated to delivering the highest standards of healthcare. Our unwavering commitment is to attain and uphold excellence in all facets of our operations. At H Healthcare, we prioritize the comfort and satisfaction of our clients and patients.

Taking into consideration the sensitivity to our patients' needs, we are resolute in delivering superior medical care within a welcoming environment. Our esteemed medical staff comprises highly skilled and experienced physicians covering a diverse array of medical specialties, complemented by well-trained nurses, allied health professionals, medical technicians, and dedicated support staff. Together, we are devoted to providing you with unparalleled service and care during your time with us.

Beyond the treatment, care, and management of our clients and patients, we actively engage in disease prevention initiatives and offer preventive health services to align with the government's efforts to foster a healthy nation. We advocate for individuals to take charge of their health through our executive health management programs. At H, we aim to ensure that your experience is not only pleasant but also convenient and comfortable. Most importantly, we are dedicated to helping you prevent diseases and maintain good health for an extended period. We are eager for the opportunity to serve you and your family and sincerely appreciate the trust you place in us.

The Global Entrepreneur

Professor Dr. Md Bipul Nazir, the Founder and Managing Director of H Healthcare Berhad, is a seasoned Global Entrepreneur with over a decade of diverse experience spanning healthcare, shipping, garments, oil & gas, trading, training, IT, airlines, and agriculture industries. As a global entrepreneur and expert in the healthcare sector, Dr. Nazir recognizes the inherent potential for sustainability and reliability within the healthcare domain.

Guided by his adept leadership and entrepreneurial acumen, Prof. Nazir holds significant business interests in various ventures, including New World Medical Centre, H Clinics Group, H Telemedicine New York, H Air Ambulance, The Fruit Story Sweden, Greenlife Healthcare, BeFit Wellness Hub Sdn. Bhd., HBW TV Sdn. Bhd., and McClane Capital London. Additionally, he serves as the Executive Chairman of HHBC Corporation Management Co. Ltd. and the International Training & Development Institute (ITDI).

Prof. Nazir's multifaceted expertise and global perspective underscore his commitment to advancing the healthcare industry, and his diverse business portfolio reflects his unwavering dedication to driving innovation and excellence across international markets.

His Unique & Outstanding Leadership

In the realm of healthcare, Professor Dr Md Bipul Nazir ardently upholds his mission and vision to advance the industry, aiming to save more lives. His commitment to leading his companies with unwavering integrity and a foundation built on love, care, and compassion underscores his dedication to this noble cause. Collaborating closely with Harvard-trained leaders in medicine and healthcare research, Prof. Nazir also engages with specialists and consultants across diverse fields of medicine, as well as accomplished professionals in allied health and alternative medicine.

Professor Dr Md Bipul Nazir has achieved a significant milestone with the endorsement of Harvard for the world's first "Comprehensive Health Advanced Management Programme (CHAMP)." This groundbreaking program adopts a holistic approach, offering a total healthcare solution that integrates the most advanced and modern technology. Driven by a deep sense of responsibility, Prof. Nazir's initiatives represent a commitment to leveraging cutting-edge practices and collaborating with esteemed institutions to elevate the standards of healthcare on a global scale.

The Leader with Integrity!

The CHAMP program represents a forward-looking paradigm for the healthcare industry, having garnered endorsement from Harvard. It integrates adaptive leadership approaches in medicine with a meticulously structured system, offering a distinctive fusion of modern medicine and alternative therapies. This approach extends to lifestyle modifications and dietary habits, with CHAMP advocating for natural healing through activating individual body cells and the immune system. This innovative paradigm shift is poised to become a more widely accepted solution compared to conventional stem cell technology.

Professor Dr Md Bipul Nazir envisions establishing top-tier healthcare infrastructure in the South East Asian region, prioritizing the well-being of those in need. His focus extends beyond delivering quality and contemporary care to emphasizing the value of care for patients. Prof. Nazir places integrity at the forefront of his business philosophy, introducing a novel approach to patient management and cultivating a culture of comprehensive patient care across clinics, medical centers, and hospitals under his guidance. This commitment reflects a dedication to elevating healthcare standards and patient experience on a global scale.

The Leader with Integrity!

Professor Dr. Md Bipul Nazir has revolutionized the healthcare paradigm through the establishment of a patient-centric medical center, notably the H Ambulatory Care Centre. Under his leadership, Family Physicians take a holistic approach, overseeing patients comprehensively and prioritizing the treatment of diseases at their root causes. This transformative approach involves strategic investments in the healthcare system, with a specific focus on uncovering the fundamental factors contributing to diseases, including genetic predispositions, lifestyle choices, dietary habits, environmental influences, and other social factors. The result is a pragmatic and cost-effective healthcare system designed for the betterment of humanity, providing affordable and high-value services to the community. This innovative model underscores Prof. Nazir's commitment to creating a healthcare system that addresses the diverse needs of individuals while ensuring accessibility and affordability for the broader community.

Professor Dr. Md Bipul Nazir, an accomplished and self-driven Founding Managing Director, possesses a demonstrable track record and the ability to cultivate and inspire management teams, maximizing company efficiency and profitability as he steers ventures into new horizons.

Aligned with the transformative motto from "Sickcare to Healthcare," Prof. Nazir has spearheaded the development of the World's Best Centre of Excellence. This includes a portfolio of esteemed healthcare brands such as Swift Heal, Diet Ideas, Eye Fit, Pink Physio, DNA Spectrum, and the notable BeFit Wellness Hub. The latter stands as a groundbreaking achievement, being the sole digital and comprehensive wellness hub in Asia, offering an array of advanced natural wellness services. BeFit Wellness Hub not only provides options for disease management but also serves as a platform for integrated medicine implementation.

Actively engaged as a healthcare leader, Prof. Nazir has expanded the healthcare business footprint to encompass Singapore, Cambodia, the USA, India, Vietnam, Indonesia, and the U.A.E. Amidst the challenges posed by the Covid-19 pandemic, Prof. Nazir presented a proposal titled "Alternative Medicine and Treatment Methods for Coronavirus" to the United Nations and World Health Organization. Widely accepted in numerous countries, his proposal earned special recognition from the German government, affirming Prof. Nazir's impactful contributions to global health initiatives.

Professor Dr. Md Bipul Nazir stands as a prominent healthcare leader shaping the present and future landscape of the industry. The group he leads is poised to extend the transformative motto of "From Sickcare to Healthcare" to diverse countries. In the coming years, H is slated to establish a 600-bedded research hospital in Jinan, China, a 300-bedded international hospital in North Sumatra, 12 Ambulatory Care Centers in Malaysia, and multiple wellness hubs in the UAE, Indonesia, India, and Thailand.

Beyond his role as a healthcare leader, Prof. Nazir maintains a profound connection with the public and society, actively contributing to the enhancement of healthcare standards globally. His vision extends to the establishment of sustainable solutions for improved healthcare and living conditions, both within Malaysia and on an international scale.

Engaging with numerous community, national, and international charitable and non-profitable institutions, including Rose Charity Malaysia, Rose Charity International, Rotary Club, Lions Club, Sihat-Sihat Malaysia, National Think Tank, and more, Prof. Nazir exemplifies a commitment to caring for people, understanding their needs, and championing initiatives that contribute to lasting positive change.

Leveraging his extensive corporate, social, and charitable leadership experience, Professor Dr. Md Bipul Nazir has effectively overseen numerous successful national and international humanitarian projects. These initiatives include addressing early-stage Rohingya food issues, providing crucial support to the Medan government by supplying COVID-related equipment and materials, and contributing to healthcare initiatives in various nations across the African continent. His strategic leadership has played a pivotal role in helping communities overcome significant challenges on a global scale.

Driven by a noble intention to aid society in both the recovery and prevention of illness, Prof. Nazir assumes a pivotal role in social contribution, yielding noteworthy results, reassurance, and benefits for those in need. Actively engaged, he participates in diverse charity events, including initiatives with Rose Charity, children's health education programs for schools, the digitization of libraries for underprivileged schools, and providing assistance to various orphanage centers globally. His active involvement underscores a commitment to making a positive impact on a global scale.

Guided by innovative ideas, a visionary perspective, and a compassionate mission, Professor Dr. Md Bipul Nazir emphasizes the adage that prevention is better than cure. In alignment with this ethos, he has introduced a groundbreaking healthcare program named "Sihat-Sihat Malaysia," garnering significant public response and support from H Healthcare Group. Under this initiative, over 20,000 Malaysians have undergone screenings.

The primary objective of the Sihat-Sihat Malaysia program is to impart education on healthy lifestyles, balanced diets, and early detection practices. By fostering awareness, the program aims to empower individuals to proactively prevent diseases at their early stages. Additionally, it serves as an educational platform, equipping people with the knowledge to adopt healthier lifestyles for long-term well-being.

S O C I A L A C T I V I T I E S

Professor Dr. Md Bipul Nazir orchestrated a Preventive Health Care and Health Awareness Camp at the University of Science Malaysia (USM) Penang in January 2019. The event, attended by the entire teaching faculty, including Professors, Lecturers, and the Chancellor, with the latter serving as the guest of honor, proved instrumental in imparting insights into early detection and preventive healthcare solutions. The program significantly benefited the institute and its faculty members, enabling them to share acquired knowledge on preventive healthcare education and solutions with students, departmental staff, and the broader community.

Additionally, Professor Dr. Md Bipul Nazir organized a healthcare camp focused on Preventive Health Care, Lifestyle Changes, and Annual Physical Wellness Health Screening at IVOY property group. Over 70 top officials and associates attended, with Professor Dr. Md Bipul Nazir demonstrating support by distributing over 100 complimentary health screening vouchers. He also played an active role in the annual dialogue of the Penang Centre of Medical Tourism Board at KOMTAR (the state government office), participating in the committee to assist, analyze, and contribute feedback, knowledge, ideas, and core values. His objective was to aid in strategic planning to enhance and promote medical tourism in Penang.

Professor Dr. Md Bipul Nazir actively participated in discussions alongside Southeast Asian leaders, heads of state, and top government officials from the region to address the Rohingya (Myanmar Nationals) crisis in Bangladesh. Leading a team of volunteers, including Rotary Club Medan, Indonesia, he provided vital food aid to over 2000 Rohingya families. The event took place in 2017 at Istana Koki in Medan, Indonesia.

In a collaborative effort, Prof. Nazir engaged in discussions with the Head of Mission from the Singapore government to explore potential collaborations and support for transforming Singapore's Health Care System from Quality Care to Value Care.

Furthermore, Prof. Nazir conducted research on Health Education and authored a book titled "Early Detection and Prevention" at GreenLife Health Care, Malaysia. He played a pivotal role in educating staff at various government entities, private institutions, NGOs, schools, colleges, and universities on preventive healthcare and lifestyle changes.

He led a team actively engaged in discussions to contribute to the development process of the Cambodian healthcare system. Additionally, he took a leadership role with top government officials and teams in Malaysia during the Global Health and Travel conference. The objective of the team's participation was to share valuable knowledge and experiences aimed at enhancing healthcare facilities and systems in Cambodia. He also met with the head of mission from the Vietnam Government, leading a team of experts to explore possible solutions to the difficulties and challenges currently faced by their healthcare industry.

As part of his charitable endeavors, he provided assistance to over 500 children with cancer, supporting them in their treatment. Furthermore, he made significant contributions to education by assisting local schools and addressing social needs within the community.

Nazir, The Global Business Machine!

Prof. Nazir directs his primary business focus to the ASEAN region, leveraging his understanding of market dynamics and strategic planning. With a diverse business background, he identifies healthcare as a sustainable and reliable venture, driven by a passion for holistic well-being. Prof. Nazir envisions establishing premier healthcare infrastructure in Southeast Asia, emphasizing not only quality and modern care but also the inherent value of patient well-being. His commitment to integrity precedes business pursuits, reflecting a dedication to making a meaningful impact in the healthcare sector.

Business Expansion in SEA Countries

In the era of heightened economic competition, Asian healthcare emerges as a focal point for global healthcare growth. This surge is propelled by robust fundamentals, including a rapidly growing aging population, increasing affluence, a rising middle class, and a growing incidence of chronic diseases. Despite these opportunities, a significant demand-supply gap and low public spending on healthcare present challenges in the operating landscape. Numerous Southeast Asian economies grapple with underdeveloped healthcare systems. Looking ahead, Prof. Nazir envisions the need for systemic changes, supported by investor-friendly policies and collaborations, to establish a resilient healthcare ecosystem for the future.

The healthcare sector in Southeast Asia is gaining substantial appeal with a growing population and increased personal disposable income. While healthcare expenditure remains comparatively low, it is steadily rising. Despite varying service quality across countries, improvements are underway throughout the region.

Malaysia, one of the most successful nations in Southeast Asia, boasts consistent robust growth as a middle-income country. Guided by government initiatives, the country is progressively embracing technology and innovation. The H Healthcare Group anticipates seizing this opportunity by opening more Ambulatory Care Centers (ACC) in strategic locations across Malaysia. This initiative aims to cater to visitors choosing Malaysia as a health tourism destination in Asia.

Nazir, The Global Business Machine!

M I L E S T O N E

GLOBAL BUSINESS LEADER

Prof. Nazir has established extensive connections across Southeast Asian countries, fostering collaborations with government agencies and organizations, including MIDA and Investment & Development Authorities. H Healthcare is dedicated to creating a sustainable healthcare solution, initiating a paradigm shift from sick care to healthcare through a three-pronged approach: empowering self-care by promoting health literacy, raising health awareness through comprehensive screening, and delivering continuous value care for maximum benefits.

As the holding company, H Healthcare Berhad is committed to developing Medical Centers, Ambulatory Care Centers, Clinics, health education platforms, universities, and health media across Southeast Asia. Initially established in Malaysia, the company is expanding its operations to Singapore, Cambodia, Vietnam, China, Thailand, and Indonesia. While these models serve as valuable examples, the intention is to inspire policymakers, investors, social entrepreneurs, and the broader business community to scale up and replicate these models for the greater good of the inclusive economy across Southeast Asia and beyond.

GLOBAL BUSINESS LEADER

The H Group initiated strategic planning in Cambodia over the past two years, capitalizing on the country's renewed economic dynamism and transition towards industrialization and export. With a healthcare sector ripe for improvement, H's presence is poised to bring about remarkable and sustainable changes to Cambodia's economy, benefiting both the government and the public. Currently, many patients seek quality and advanced care abroad in Singapore, Thailand, and Vietnam due to the limited options domestically.

Despite being one of Southeast Asia's smallest countries, Singapore boasts the most advanced and sophisticated economy in the region, consistently ranked among the world's best places for business. Prof. Nazir and the H Group closely collaborate with the Singapore government, sharing business plans, ideas, and necessary development to maintain a stronghold in the medical tourism industry.

Indonesia, with the region's largest population and economy, stands as the giant of Southeast Asia and a key member of the G20. The H Group entered the Indonesian market in 2014, currently exploring opportunities to develop the medical tourism industry from Indonesia to Thailand, Singapore, or Malaysia, given its significant economic size and growth.

Welcoming Tan Sri Dr. Ismail Hj. Bakar to the grand opening of H Ambulatory Care Centre (HACC).

AMBULATORY MEDICAL CENTRE OF THE YEAR IN ASIA PACIFIC

H AMBULATORY CARE CENTRE

H Ambulatory Care Centre (HACC), based in Penang, is committed to providing ethical medical and surgical services to its esteemed patients/clients. Its team of passionate professionals with special interests in preventive healthcare utilise an innovative approach and advanced technology to kick-start the reversal of metabolic and non-communicable diseases.

Knowing that a conducive feel-good-ambience contributes significantly in the process of homeosis and healing, this centre walks the extra miles to co-design a superbly conducive environment which incorporates all factors that are known to facilitate optimal healing of the human body and mind. This is further augmented by its team of human-friendly staff who are specially trained to serve with utmost compassion and diligence. Together, they provide a unique touch of healing to achieve a superior par excellence service which is second to none.

HACC strategically focuses on four key faculties of service to initiate the paradigm shift, "From Sickcare to Healthcare". Their emphasis is on preventive healthcare which includes the triple faculties of Global Health Screening, Primary Care, and Innovative Diabetic Management. The fourth faculty, namely Wound Management Faculty, is a curative faculty which is an essential component of care to prevent the need for foot/leg amputations among many diabetics.

The Innovative Diabetes Management Programme looks at Type 2 Diabetes scientifically as a reversible lifestyle and dietary disease. This centre puts in place all the necessary

Feynman Lau and Md Bipul Nazir

components of management towards a definite reversal of diabetes at its early stages. For the more advanced cases, HACC aims at reducing the quantity of medicines necessary to control the disease while mitigating the disease process to negate its complications.

Although the primary focus of HACC is on preventive healthcare, diabetics who present with late complications, such as foot ulcer/gangrene, shall be managed by HACC's world-class wound care expert/trainer to save their foot/leg from the devastating process of amputation. Truly, HACC's wound-care team feels deeply with compassion what their diabetic patients sentimentally feel about the reality of losing their foot/leg.

The Global Health Screening creates the 'need-to-know' attitude while provoking the patients/clients to bring out the best attitude of taking responsibility for their own health. This centre strongly believes in the superiority of integrative health management that necessitates the

optimal participation of their valued patients/clients in their health management to produce the most remarkable and satisfying result.

Integrity and meaningful value-care are placed at the forefront of the centre's multi-prong objectives. The other components of care naturally fall into place alongside the flow of the process to create an exemplary healthcare centre that is both effective and sustainable in an increasingly challenging environment of escalating costs and expectations of the healthcare industry end-users.

Much attention has been focused on providing value-care. HACC professionals and staff are regularly primed to think for their patients/clients. Thus, costs are kept to a minimum by avoiding the injudicious ordering or use of expensive investigations, surgical procedures, or high-tech equipment. Only investigations, surgeries, or the use of high-tech that contribute towards net value-care shall be carried out to produce a value-added outcome and satisfaction for its patients/clients. HACC's decision-makers are constantly reminded to reflect on the equation of value-care to ensure that the outcome of their care, their patients level of satisfaction, and the cost of treatment together produce the best value-added care for those they serve.

HACC shall serve with pride to enable its patients who walk in with troubled body and mind to leave the centre with a sweet smile and a lingering memory of "A Satisfying Centre That Serves With Great Compassion and Love".

〔檳城 26 日讯〕 檳州首长曹观友指出，檳州政府与私人领域业者配合下，根据 2021-2025 年马来西亚医疗旅游业蓝图，檳城在医疗旅游方面处于领先的地位。

他说，单单在 2019 年，檳州迎来 50 万名海外病人当中，赚取了 7.5 亿令吉，获评为医疗保健旅游领域中最受认可的州属。

因此，他相信，随着这家 BeFit Well-ness Hub 及 H Ambulatory Care Centre 的加入，再加上现有檳城的 18 家私人医院，将进一步巩固檳州作为我国医疗旅游业首选目的地的地位。

曹观友是于周六下午在檳城国际会展中心为 H 保健集团（H HealthCare Group）的 BeFit Well-ness Hub 及 H Ambulatory Care Centre 主持开幕仪式时，如是表示。他也欢迎该集团选择在檳州创设保健及护理中心，一起朝向檳城 2030 愿景迈进，打造更有素质的保健与生活。

曹观友指出，这家 H 保健中心是为病人提供治疗护理，而 BeFit 健康中心的创建，是为了继续进行非医疗和非手术工作，以增强客户的健康，防止疾病再次发作或复发。

他认为，预防性医疗保健，比治疗护理更为重要。“如果我们可以预防疾病，我们就不需要治疗，从而节省大量金钱和痛苦。”

出席者包括该集团创办人兼董事经理莫哈曼比普纳兹尔、主席丹斯里依斯迈哈芝巴卡、管理主席郑联语、执行董事莎琪嘉、刘荣鸿及斯里特议医生。#

他说，透过疗程可以帮助女性将子宫恢复到正位，包括进行盆地肌的锻炼，让器官逐步恢复到以往的状态。

执行董事刘荣鸿说，很多女性在面临此等问题时感到难以启齿，并认为这种病无法完全康复，但其实不然，因为这类型的问题，在国外早已有了解决方案。

“尿失禁、子宫脱垂患者是可以治疗并康复的，不需要吃药或开刀，只要遵循疗程并进行治疗。根据临床数据，大约三个星期可看到效果，但需视个人程度而定。”

BeFit健康中心及H门诊护理中心，提供疾病及物理治疗、预防、体重管理、身体检查等服务，而Pink Physio为BeFit健康中心的其中一项服务，是檳城第一家专注于女性健康的物理治疗中心。

Pink Physio 专注于女性健康理疗，帮助女性尿失禁、频尿、子宫脱垂、产后和绝经后性功能障碍、盆腔疼痛、盆底功能障碍以及有关恢复正常生活的健康及锻炼方法。

有兴趣了解更多咨询者，可浏览<https://befitwellnesshub.com>。

出席者包括H Healthcare 有限公司医疗总监斯里达兰。

ONE-OF-A-KIND TWIN FACILITIES IN PENANG H AMBULATORY CARE CENTRE & BEFIT WELLNESS HUB

H Ambulatory Care Centre and BeFit Wellness Hub are the twin facilities created in that direction to prioritise human-centred, affordable value care as well as early detection and proactive prompt management of human diseases and the ageing process in this system.

H Ambulatory Care Centre is neither a hospital, nor a normal outpatient clinic. It stands in-between, and falls under the category of Ambulatory Care Center by definition. It is an excellent choice for patients whose sicknesses are too severe to be treated as outpatients in a conventional clinic and at the same time do not need a high cost, less personalised sophisticated hospital with multidisciplinary management.

Furthermore, hospital charges had escalated to a level that raises significant concern among patients, insurance companies and generous employers who pay the medical expenses of their employees. The benefits of this category of care center go beyond just cost saving. Being not too big, not too complex, and low patient volume center, H Ambulatory

From the left: Mr Lau Eng Hong, Executive Director of H Healthcare Group
Second from the left: Mr Md Bipul Nazir, Founder and Managing Director of H Healthcare Group
Third from the left: Dato' Sri TI Lian Ker, Deputy Minister of Youth and Sports
From the right: Dr Victor TI Lian Geh, Deputy Chairman of H Healthcare Group

Care Centre is intrinsically easier to manage with smart management to ensure value care and a more personalised human care with optimal communication that can be very comforting and satisfying.

Naturally, within such set-up, clinical decisions would have to rely more on human (doctor's) decisions based on patient's detail history and physical findings which are often the most important pointers of the patient's diseases. The management of the

patients would naturally be more human-based, or in other words, less mechanical. The use of expensive high-tech equipment may often be rendered irrelevant

Patients with more severe diseases who require more prolonged, complex and multidisciplinary management shall be appropriately referred to the most relevant conventional hospitals of their own choice based on truthful information provided by H Ambulatory Care Centre doctors. The patients'

FROM SICK CARE TO HEALTHCARE

autonomy to decide upon their choice of doctor and hospital shall be duly respected. The value-added features of an ambulatory care center shall naturally enable it to gain popularity and develop into a gateway to conventional hospitals. Indeed, H

Ambulatory Care Centre is an idea whose time has come to effectively address the many problems playing the existing healthcare models.

Twinning the curative care facilities of H Ambulatory Care Centre, BeFit Wellness Hub provides follow-ups as well as non-surgical and non-medical treatment to further enhance our patients' wellbeing. Patients who have been cured will be educated and encouraged to practise a healthy lifestyle to remain in optimal health so that they can avoid frequent recurrence or onset of diseases.

The vision of H Healthcare Group is to become a leader in creating a growing community with optimal health and life expectancy. H Healthcare is on a mission to create a sustainable healthcare solution by initiating a paradigm shift from sickcare to healthcare via an efficient 3-prong action: empowering, enlightening and caring.

H Healthcare heals, beautifies and satisfies all human holistically, regardless of colour and creed. With our humble heart, we create smiles, trust, harmony, and happiness. H signifies Healing, Health, Harmony, Hope and Happiness. H, the signature of H Healthcare.

Chow said the establishment of the two private healthcare centres would certainly set a new benchmark in the healthcare industry in Penang.

"As human beings, someday we will fall sick and grow old. While lying in the sickbed, what we want most is cosy care that gives us a 'feel-good-experience' to help us recover.

"Upon recovery, it would be good if there is some form of a follow-up encouragement and facility to help us achieve optimal health and prevent diseases.

TWO newly-private healthcare centres, namely BeFit Wellness Hub and H Ambulatory Care Centre, are now open to the public.

Both of the facilities are located next to each other at the Setia SPICE Canopy in Bayan Lepas and managed by H Healthcare Berhad.

H Healthcare Berhad founder and managing director Md Bipul Nazir said H Ambulatory Care Centre provides curative care for the sick while BeFit Wellness Hub is created to continue non-medical and non-surgical works to enhance the clients' health to prevent further onset or recurrence of diseases.

"They act as a bridge between full-fledged medical centres and general practice clinics," he said in his speech before Chief Minister Chow Kon Yeow officiated the opening ceremony at Setia SPICE Canopy in Bayan Lepas today.

"In general, both facilities provide a range of comprehensive specialist and surgical services including wellness, diagnosis, treatment, and rehabilitation.

Chow said the establishment of the two private healthcare centres would certainly set a new benchmark in the healthcare industry in Penang.

"And today, I am very glad to know that we have H Ambulatory Care Centre and BeFit Wellness Hub in Penang to provide both the curative healthcare and preventive healthcare modalities to the people of Penang," he said.

Chow also expressed his confidence that the two private medical centres in Penang would further solidify the state's position as the top destination of Malaysia Healthcare Travel Industry.

"And according to the Malaysia Healthcare Travel Industry Blueprint 2021-2025, Penang leads the way in healthcare travel revenue, earning RM750 million from 500,000 patients who flew to the state in 2019.

"Penang was also named as the 'Most Established State in Healthcare Travel'," he added.

Also present during the opening ceremony were H Healthcare Berhad chairman Tan Sri Datuk Seri Dr Ismail Bakar and H Healthcare Berhad deputy chairman Dr Ti Lian Geh.

曹观友：私人领域配合 槟医疗旅游处领先地位

2022年2月26日

莎琪嘉（左2起）、刘荣鸿、斯里特汉医生、曹观友、莫哈曼比普纳兹尔、丹斯里依斯迈哈芝巴卡及及郑联语医生主持推介礼。

槟州首长曹观友指出，槟州政府与私人领域业者配合下，根据2021-2025年马来西亚医疗旅游业蓝图，槟城在医疗旅游方面处于领先的地位。

他说，单单在2019年，槟州迎来50万名海外病人当中，赚取了7.5亿令吉，获评为医疗保健旅游领域中最受认可的州属。

他也欢迎该集团选择在槟州创设保健及护理中心，一起朝向槟城2030愿景迈进，打造更有素质的保健与生活。

青年及体育副部长拿督斯里郑联科走访，对两个机构给与高度好评。

BeFit健康及H门诊护理中心 曹观友：巩固槟城医药旅游地位

60点阅 10月前

（檳城2日讯）槟州首长曹观友指出，随着BeFit健康中心及H门诊护理中心的运作，槟州又新增一家疾病治疗及预防服务的机构，可以造福槟州人民。

曹观友日前在檳城国际会展中心处，为H Healthcare有限公司的BeFit健康中心及H门诊护理中心主持开幕时，这么说。

他说，随着此医疗中心的运作，加上槟州现有的18家私人医院，可以巩固檳城在医药旅游地位，成为大马最佳医药旅游地点。

曹观友（左3）为BeFit健康中心及H门诊护理中心，主持开幕。

他续说，根据《2021-2025大马医药旅游大蓝图》，在2019年有50万病患飞到檳城进行治疗，并从医药旅游处获得7亿5000万令吉盈利，这让檳城在医药旅游领域中取得领先，檳州也被誉为“最佳医药旅游州属”。

他指出，人们总会生病和老迈，但当真的躺在病床时，当然希望可以得到适当的照护直到康复，并在康复后得到最佳的后续跟进，以让健康痊愈及防范疾病再次复发。

曹观友（中）在牌匾上签名见证开幕。

“BeFit健康中心及H门诊护理中心，提供疾病治疗及预防服务，我希望此中心的服务，可以造福槟州人民。”

全檳首个女性底盘肌理疗服务推介 章瑛冀女性脱垂尿失禁等问题获改善

章瑛（左3）于BeFit健康中心正式推介“Pink Physio 子宫底盘肌理疗服务”。左起为刘荣鸿、毕普纳兹里、斯里达兰医生、林明蕊博士。

为提升女性对于产后护理及女性个人健康的重视，檳城社会发展与非伊斯兰宗教事务委员会主席、檳城妇女發展机构（PWDC）主席章瑛今日配合H Healthcare有限公司，于BeFit健康中心正式推介“Pink Physio 子宫底盘肌理疗服务”，希望面临子宫脱垂、尿失禁等问题的女性可前来了解更多治疗方案。

章瑛今日在檳城国际会展中心H Healthcare有限公司领导的带领下，聆听关于该公司简介及汇报，并参观BeFit健康中心及H门诊护理中心。

她说，许多病患在面诊问题时，不敢或不知道有什么管道可以去寻求解决方案，因此她希望更多人包括女性，可来到BeFit健康中心及H门诊护理中心，了解更多的护理和治疗方案。

H Healthcare 有限公司董事经理毕普纳兹里说，很多女性产后面临尿失禁、器官脱垂及阴道过于松弛等现象，但因为缺乏正确的医疗知识，所以就放弃治疗。

他说，透过疗程可以帮助女性将子宫恢复到原位，包括进行底盘肌的锻炼，让器官逐步恢复到以往的状态。

执行董事刘荣鸿说，很多女性在面临此等问题时感到难以启齿，并认为这种病无法完全康复，但其实不然。这类型的问题，在国外早已有了解决方案。

“尿失禁、子宫脱垂患者是可以治疗并康复的。不需吃药和开刀，只要遵循疗程并进行治疗，据临床数据，大约三个星期可看到效果，但需视个人程度而定。”

BeFit健康中心及H门诊护理中心，提供疾病及物理治疗、预防性治疗、体重管理、身体检查等服务，而Pink Physio，为BeFit健康中心一员，是檳城第一家专注于女性健康的物理治疗中心。

MEDICAL

AMBULATORY MEDICAL CENTRE OF THE YEAR IN ASIA PACIFIC H AMBULATORY CARE CENTRE

H Ambulatory Care Centre (HACC), based in Penang, is committed to providing ethical medical and surgical services to its esteemed patients/clients. Its team of passionate professionals with special interests in preventive healthcare utilise an innovative approach and advanced technology to kick-start the reversal of metabolic and non-communicable diseases.

Knowing that a conducive feel-good ambience contributes significantly in the process of homeostasis and healing, this centre walks the extra miles to co-design a superbly conducive environment which incorporates all factors that are known to facilitate optimal healing of the human body and mind. This is further augmented by its team of human-friendly staff who are specially trained to serve with utmost compassion and diligence. Together, they provide a unique touch of healing to achieve a superior par excellence service which is second to none.

HACC strategically focuses on four key faculties of service to initiate the paradigm shift. From Sickcare to Healthcare. Their emphasis is on preventive healthcare which includes the triple faculties of Global Health Screening, Primary Care, and Innovative Diabetic Management. The fourth faculty, namely Wound Management Facility, is a curative faculty which is an essential component of care to prevent the need for foot/leg amputations among many diabetics. The Innovative Diabetes Management Programme looks at Type 2 Diabetes scientifically as a reversible lifestyle and dietary disease. This centre puts in place all the necessary

Feynman Lau and Md Bipul Nazir

components of management towards definite reversal of diabetes at its early stages. For the more advanced cases, HACC aims at reducing the quantity of medicines necessary to control the disease while mitigating the disease process to negate its complications.

Although the primary focus of HACC is on preventive healthcare, diabetics who present with late complications, such as foot ulcer/gangrene, shall be managed by HACC's world-class wound care expert/trainer to save their foot/leg from the devastating process of amputation. Truly, HACC's wound-care team feels deeply with compassion what their diabetic patients sentimentally feel about the reality of losing their foot/leg.

The Global Health Screening creates the 'need-to-know' attitude while provoking the patients/clients to bring out the best attitude of taking responsibility for their own health. This centre strongly believes in the superiority of integrative health management that necessitates the

optimal participation of their valued patients/clients in their health management to produce the most remarkable and satisfying result.

Integrity and meaningful value-care are placed at the forefront of the centre's multi-prong objectives. The other components of care naturally fall into place alongside the flow of the process to create an exemplary healthcare centre that is both effective and sustainable in an increasingly challenging environment of escalating costs and expectations of the healthcare industry end-users.

Much attention has been focused on providing value-care. HACC professionals and staff are regularly primed to think for their patients/clients. Thus, costs are kept to a minimum by avoiding the injudicious ordering or use of expensive investigations, surgical procedures, or high-tech equipment. Only investigations, surgeries, or the use of high-tech that contribute towards net value-care shall be carried out to produce a value-added outcome and satisfaction for its patients/clients. HACC's decision-makers are constantly reminded to reflect on the equation of value-care to ensure that the outcome of their care, their patients level of satisfaction, and the cost of treatment together produce the best value-added care for those they serve.

HACC shall serve with pride to enable its patients who walk in with troubled body and mind to leave the centre with a sweet smile and a lingering memory of 'A Satisfying Centre That Serves With Great Compassion and Love'.
